

## SafeDrivePod

Ensure your drivers are safe from cellphone distractions with SafeDrivePod: a small device offering a powerful solution for ending distracted driving.

### EASY TO USE:

1. Install an app on the driver's phone
2. Register the phone number with SafeDrivePod
3. Place the small pod in the truck

### How it works

When the truck is moving, the touch screen is blocked. After 20 seconds of standstill, the touch screen is unblocked again and your driver can use the phone!

Drivers can still make hands-free calls and use navigation when on the move.

Managers can view a detailed driver behavior report for all drivers registered with the system.

SafeDrivePod provides a return on investment within one year by reducing or eliminating costs from distracted driving related accidents. And it gets your drivers home safe at the end of the day. SafeDrivePod is designed to stop preventable crashes due to cellphone use. Seven out of 10 people in North American admit to knowing texting and driving is wrong, and yet, continue to do so.

The National Safety Council estimates **25% of crashes** involve cell phones.

**21%** Phone Calls

**4%** Texting

While fatalities from crashes involving cell phone use have decreased in recent years, nonfatal crashes caused by phone distraction have increased resulting in property damage and non-fatal injuries costing your company money and time.

### PRICING

**\$90 per unit; a savings of \$30**  
offered to Protective Insurance customers
